

Md Anikur Rahaman

✉ rahamananikmd@gmail.com ☎ 01774 225 956 📁 Portfolio in Habib Adnan 🌐 Md Anikur Rahaman

Objective

Hi!! I am Md Anikur Rahaman, a Computer Science graduate from East West University with expertise in software engineering, research. Currently working as a Web Developer at Sparktech Agency, I specialize in **PHP** while maintaining **Java** as my preferred language. Passionate about **problem-solving** and **ML research**, I bring strong adaptability, experience in ML model implementation, AI chatbot integrated in web applications, and proven skills in project management and software development.

Education

East West University, Bangladesh

Sept 2019 – Sept 2024

BSC in Computer Science and Engineering

- CGPA: 3.03/4.0 ([a link of EWU](#) 📄)
- **Coursework:** Programing language, Comparison of Learning Algorithms, Artificial Intelligence, Machine Learning, Web development, Mobile Application, Data Mining, Advanced Data Science.

Experience

WordPress Plugin & Web Developer

Sparktech Agency,

Hands-on experience in developing custom WordPress plugins and dynamic web applications.

bdCalling IT

Jan 2025 – Present

- Developed and customized WordPress plugins to enhance website functionality, including custom dashboard tabs, WooCommerce integrations, and Tutor LMS extensions.
- Created and maintained responsive, SEO-friendly websites using HTML, CSS, JavaScript, PHP, and MySQL.
- Built custom WordPress themes and child themes with performance optimization and cross-browser compatibility.
- Integrated third-party APIs and payment gateways (e.g., PayPal, Stripe) into client websites.
- Ensured websites were secure, fast, and compliant with modern coding standards and best practices.
- Collaborated with clients to understand requirements and deliver user-friendly, scalable web solutions.
- Version-controlled projects using Git and managed deployments in live environments.

Publications(Relesed On Going)

DeepCerviNet: Enhance Cervical Cancer Classification using Supervised Learning Model (RAICON 2024) held on 30th November 2024

Dec 2024

Md Anikur Rahaman, Maksura Binte Rabbani Nuha, Md Safin, Al Hossain, *Dr. Raihan Ul Islam
[IEEE Xplore](#) | [Publication](#) | [Link](#) 📄

Enhancing Cervical Cancer Detection: Leveraging Semi-Supervised Learning for Improved Prognosis (ICCIT 2024) held on — 2024

June 2025

Md Safin, Maksura Binte Rabbani Nuha, Al Hossain, **Md Anikur Rahaman**, *Dr. Raihan Ul Islam
[IEEE Xplore](#) | [Publication](#) | [Link](#) 📄

Cervical Cancer Classification: Deep Learning Techniques using Fix Match Semi Supervised Approach (ICDMIS 2024) held on 7th - 8th October 2024

August 2025

Md Anikur Rahaman, Zeshan Ahmed, *Dr. Ahmed Wasif Reza, KM Safin Kamal
[Springer Nature Link](#) | [Publication](#) | [Link](#) 📄

Projects

Online Shop Recommendation System-Fully Automated(Thesis)

Processig for publication

Developed a machine learning-based web application to recommend the best store for a specific product by analyzing user reviews(**comment**) and product prices. The core objective was to rank stores based on sentiment extracted from customer comments and to compare product pricing between different stores.

- Collected a custom dataset from Daraz, including product reviews and corresponding prices across various shops.
- Balanced and processed the data set, cleaned, and normalized the reviews.
- Applied dynamic sentiment labeling on user comments using NLP techniques.
- Trained multiple machine learning models including BERT, RoBERTa, DistilBERT, LSTM, and Bi-LSTM to analyze review sentiments.
- Evaluated the performance of the model and selected the best-performing model for deployment.
- Calculated weighted averages based sentiment scores and product prices to generate final shop rankings.
- The selected model was deployed in a web application using Flask.

The final result met our expectations and aligned closely with the real-world user experience.

- Tools & Technologies: Python, Flask, HTML, CSS, Machine Learning, BERT, RoBERTa, DistilBERT, LSTM, Bi-LSTM

AI-Chemist Website

 [Github](#)

- I developed the AI-Chemist website for selling chemical products. This website is fully functional and responsive. For Front End i using HTML, CSS, JavaScript and Bootstrap. For Back-End control i using the PHP. and Database using MySQL in localhost server.
- Tools **Used:** HTML, CSS and JavaScript, PHP,MySQL, JQuery, and Bootstrap.

Event-Management-System-Android-App

 [Github](#)

- Built an Android Application to Manage our Event.
- The application will notify you when the schedule time has occured.
- Tools **Used:** Java, Android Studio, SQLite, OOP concept.

Contact Form App

 [Github](#)

- This is a simple contact form app responsive and good interactive app.
- User can able to fill up this form and it's interact to the mobile message.
- Tools Used: Android Studio, java and SQLite.

Technologies

Languages: Html, CSS, JavaScript, ReactJs, Java(OOP), C, PHP, Python, SQL.

Technologies: Flask, Microsoft SQL Server, MatLab, Google Colab, Kaggle, Apache, and Oracle Apex, MySQL, MongoDB, Wordpress, Android Studio.

CO-Curricular Activities and Special Qualification

- Problem Solving
- Project Management (Academic and Professional)
- Demonstrate experience working in a cross-cultural team and environment.
- Outstanding adaptability skill
- Ability to work under deadlines
- Quick learner
